ONE-STOP CAPACITY BUILDING FAX-BACK FORM

Are you developing training materials, desk guides, web pages, or other resources and products to build the capacity of your State's One-Stop staff? If so, you're probably wondering what others have done or have under development. The One-Stop Team has asked Technical Assistance and Training Corporation (TATC) and Social Policy Research Associates (SPR) to collect and disseminate information on One-Stop resources nationwide. We need your help to learn what is available. In turn, we will share what we learn with you.

Please give us a general idea of what your State may have to offer by giving a **brief** description of capacity building initiatives you **have completed or have under development**. If you have more than one initiative to describe, simply copy this form, then fax or mail the form(s) to TATC, or send an e-mail with the requested information. Project staff will follow up with you by telephone. Thanks much for your help!*

* If you recently responded to Mary Ann Lawrence's "Curriculum Sweep" effort, be assured that we have that information and are coordinating efforts. For this project we are identifying additional resources.
